

than life, with a magnificent voice, a powerful presence, an all-consuming passion for the wilderness, and a passion to preserve and protect the natural beauty of our nation.

HAMAS KILLS AGAIN

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 3, 2014

Mr. POE of Texas. Mr. Speaker, "We love death more than the Jews love life." This Hamas propaganda phrase says it all. International outsiders cry "peace, peace," but there can be no peace as long as Hamas refuses to recognize Israel's right to exist. No matter how many times leaders shake hands or how many agreements are signed, peace cannot be achieved if peace is not desired. The only reason Israel exists is because the Jews persist in surviving.

In the morning hours of November 18, a group of Orthodox Jews gathered at a synagogue in Jerusalem to pray. In the middle of their prayers, at 7 a.m., two terrorists wielding guns, axes, and butcher knives attacked them. Odai Abu Jamal and his cousin, Ghassan Abu Jamal, killed 4 rabbis and one police officer and injured 8 others before they were shot by local police. Three of the four rabbis were American citizens.

The men were members of the terrorist group known as the Popular Front for Liberation of Palestine (PFLP). While the group itself did not claim responsibility, it was quick to support the attack. Hamas, another terrorist group bent on the destruction of Israel, not only commended the attacks but called for more. Terrorist groups supporting terrorist attacks does not surprise me. But Hamas is not your typical terrorist group. It governs the entire Gaza Strip as a result of the 1.8 million Palestinians there voting them into power. And the reaction from some of the people of Gaza to the attack shows that they share its terrorist government's feelings. In the town of Rafah, the people celebrated by handing out sweets, carrying axes, and holding up posters of the terrorists. The religious elites joined in the celebration as well: loudspeakers at mosques in Gaza called out congratulations. Palestinian radio reports described the attackers as "martyrs". Undoubtedly, the terrorists' family will receive compensation from the government's "terrorist fund", which pays stipends to the families of terrorists who are imprisoned or who died during their attacks.

When an elected government and the people it governs celebrate a brutal terrorist attack, it is a reminder of the challenges Israel faces as it works for peace in the region. For the last six years, this White House has pressured the Israeli government to make concession after concession for peace. The reaction of the people in Gaza to this latest attack should wake the White House up to the unfortunate reality that, no matter how many concessions Israel makes, many Palestinians do not want peace if it means Israel continues to exist. Palestinian acts of terrorism are not just a problem of a couple of lone rats or individual terrorist groups, but they are supported by an entire infrastructure throughout the Palestinian territories that has close ties to the senior Palestinian leadership. Instead of repeatedly

twisting Israel's arm to make peace when peace can't be made, the United States should stand strong with our democratic ally against terrorists. The same attackers that want to destroy Israel also call the United States the Great Satan. They want to kill Americans too, as this latest attack that killed three Americans showed. Our first step should be to cut the funding we give to the Palestinian Authority (PA) until they take specific, verifiable, and significant acts to go after those who commit acts of terrorism. At the very least, the PA needs to stop paying reward money to the families of terrorists. Second, we should make sure that our funding to Israel is strong and robust, focused on ensuring Israel can beat back these terrorists. Finally, we need to stop publicly and privately insulting Israel. Israel is the only liberal democracy in the Middle East and one of our strongest allies in the world.

The right response to a terrorist act is not words of condemnation followed by continued pressure on the victims of terrorism. The right response is recognizing the evil for what it is and countering it with swift justice against the perpetrators and strong support for the victims.

And that's just the way it is.

10TH ANNUAL NORTHWEST INDIANA INNOVATION INDUCTION CEREMONY

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 3, 2014

Mr. VISCLOSKY. Mr. Speaker, it is with great respect and enthusiasm that I congratulate Ivy Tech Community College Northwest and its regional partners, who recently celebrated their 10th Annual Northwest Indiana Innovation Induction Ceremony. At the ceremony, which reflects the "Spirit of Innovation" in Indiana, fifteen individuals and fourteen teams were inducted as members of the 2014–2015 class of The Society of Innovators of Northwest Indiana. Of these individuals, several members were inducted as Society Fellows for their significant efforts in innovation. These individuals are Scott Albanese, Robert Coangelo, Robert Palumbo, Ph.D., Neeti Parashar, Ph.D., and Roger Pradhan, Ph.D. William E. Nangle was honored as the Gerald I. Lamkin Fellow for Innovation and Service, a special recognition named for the President Emeritus of Ivy Tech College of Indiana. Also honored were two Chanute Prize recipients, the BP "One Global Team" for the Whiting Refinery Modernization Project and PCL Alverno. In addition, a new team award designated "Accelerating Greatness" was presented for the first time this year, and the recipients were James S. Markiewicz Solar Energy Research Facility, Valparaiso University, and the Northwest Indiana Regional Development Authority. For their truly remarkable contributions to the community of Northwest Indiana and their continuous efforts to cultivate a culture of innovation, these honorees were inducted at the Horseshoe Casino in Hammond, Indiana, on Thursday, October 16, 2014.

The Society of Innovators of Northwest Indiana was created by Ivy Tech Northwest with the goal of highlighting and encouraging inno-

vative individuals and groups within the not-for-profit, public, and private sectors, as well as building a "culture of innovation" in Northwest Indiana. The importance of innovation in Northwest Indiana, as well as globally, is crucial in today's ever-changing economy. Leading the Northwest Region is Dr. Thomas G. Coley, Chancellor, Ivy Tech Community College North West and North Central Regions.

The fellows selected by the Society of Innovators were chosen for their significant innovative leadership and the impact of their accomplishments throughout Northwest Indiana and beyond. Scott Albanese, founder and chief executive officer of Albanese Confectionery Group, Incorporated, in Merrillville, launched his business thirty years ago. Today, the company generates over \$100 million in sales and its products can be found nationwide, as well as in nine other countries. In addition, Scott invented the first gummy candy in the world with a distinguishable flavor, which was previously deemed impossible. Robert Coangelo is the founding farmer of Green Sense Farms, which is the nation's largest indoor, commercial, vertical farm and the largest user of Phillips LED grow lights. The organization grows produce in a controlled environment that is free of pesticides, herbicides, and GMO seeds while distributing its products throughout the Midwest. Robert Palumbo, Ph.D., professor and Alfred W. Sieving chair of engineering, inspired the effort to build the nation's fifth solar furnace at the College of Engineering at Valparaiso University, which is utilized by undergrad students to explore new ideas in solar research. Dr. Palumbo is now part of a "pioneering" team at the James S. Markiewicz Solar Energy Research Facility. Neeti Parashar, Ph.D., spearheaded a High Energy Physics Team at Purdue University Calumet as part of a large global collaboration to discover the Higgs-Boson subatomic particle, which gave the Nobel Prize to Peter Higgs of the United Kingdom and Francois Englert of Belgium. Roger Pradhan, Ph.D. played a key role in the development of new carbon steel products for the automotive industry, and he is the leading developer of bake-hardenable steels. Dr. Pradhan received an AISI Gold Medal for his research outlining the implementation of bake-hardenable steels at Burns Harbor, and he currently holds four patents.

I am also honored to acknowledge William E. Nangle, executive editor (ret.), The Times of Northwest Indiana, who was recognized as the Gerald I. Lamkin Fellow for Outstanding Innovation & Service. In his role, Mr. Nangle introduced the "Munster Model," which provided the community with in-depth local and neighborhood news while also covering regional news. This model became a huge success in the journalism industry and is utilized nationwide. In addition, Mr. Nangle brought Indiana's seven largest newspapers together, producing statewide access to public records. Under Mr. Nangle's direction, The Times of Northwest Indiana became a national leader in its industry.

The recipients of the Chanute Prize for Team Innovation should be commended for their contributions. The BP "One Global Team" for the Whiting Refinery Modernization Project utilized a single team concept on a world scale to conduct the largest and most complex refinery construction project in BP

history. PCL Alverno introduced total microbiology automation, which revolutionized the delivery of results to patients and physicians. PCL is the first to be designated as a Seimen's Microbiology Innovation Center in the United States.

The Accelerating Greatness Award for Team Innovation included two recipients. The James S. Markiewicz Solar Energy Research Facility, located at Valparaiso University, houses the fifth solar furnace in the United States and the world's only solar furnace primarily designed, built, and used by undergrad students at an institution of higher learning. The Northwest Indiana Regional Development Authority is a regional organization that provides nearly \$30 million annually in a proven collaborative model to leverage failing assets into more than \$1 billion in infrastructure and economic development.

Mr. Speaker, I ask you and my distinguished colleagues to join me in commending these outstanding innovators. The contributions they have made to society here in Northwest Indiana and worldwide are immeasurable and lifelong. For their truly brilliant innovative ideas, projects, and leadership, each recipient is worthy of the highest commendation.

HONORING WILLIAM H. "BILL"
DETRICK

HON. JOHN B. LARSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 3, 2014

Mr. LARSON of Connecticut. Mr. Speaker, I submit these remarks today to honor William H. "Bill" Detrick, who passed away at the age of 87 on September 19, 2014. Bill Detrick was the long-time coach of the Central Connecticut State University Basketball team, and after that was the coach of Trinity College Golf team coach. He was everything that embodies a passionate, tough, and tenacious coach and person. He taught college sports until the age of 86, which is something that very few can claim.

Throughout his 29 year tenure as the Central Connecticut basketball coach, he won 468 games with two undefeated seasons out of 24 winning seasons. He brought the program to six Division II NCAA tournaments and ushered them into Division I basketball, where they remain today. The standard and foundation set by his legacy at Central Connecticut will continue on for the future of their athletic programs.

As a coach, one must assume the responsibility of developing younger generations of people as students, athletes, and most of all as people. Bill Detrick knew this as well as anyone and was able to impact the lives of each of those he coached even to this day. He instilled the same values in his three children and six grandchildren as he did his players: Hard work and dedication to what you love will always prevail in the end. Always go the extra mile in your endeavors. He preached these kinds of lessons to his children and players in order to prepare them not just for the game, but for their entire lives ahead.

A great example of his attitude in life came from a friend and golf partner of many years, who said that Bill would never ride in a cart, and always insisted on walking. Just a week

before he passed away, he walked nine holes at the age of 87. Always push yourself, even if it is during a game of such relaxation such as golf.

Mr. Detrick is survived by his wife Barbara, three children, and six grandchildren. I would like to extend my condolences to the family of Mr. Detrick during this difficult time. I hope the Holiday season reminds everyone in his life of the joyful memories that he brought, and the importance of enjoying every moment they had together. Let us all remember the values that William Detrick brought to everyone around him, and try to implement them in our everyday lives in order to strive to be the best people we can be.

DR. GUY "MOJO" LEWIS, DDS—
MAKING TEXANS SMILE

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 3, 2014

Mr. POE of Texas. Mr. Speaker, when Dr. Guy "Mojo" Lewis walks into a room, everyone knows it. With his larger-than-life stature and the mystic of Texas legend Sam Houston, his commanding presence captures attention. People can't help but smile when they see him, his presence is contagious.

As a personal friend and fellow Abilene Christian University Alum, I would like to congratulate this outstanding Texan for celebrating his 30th anniversary of practicing dentistry.

Dr. Lewis knew from early on that he wanted to be a dentist, never wavering in his decision to make people smile. After graduating from Abilene Christian University ('80), Dr. Lewis earned his Doctorate of Dentistry from Baylor College of Dentistry.

In 1984, he became a founding member of the American Academy of Cosmetic Dentistry (AACD), at a time when cosmetic dentistry was beginning to emerge. He became the youngest cosmetic dentist to be accredited by the AACD. Additionally, he is also a member of the Texas Dental Association and the American Dental Association. He received a fellowship in the International Academy for Dental Facial Esthetics.

Dr. Lewis continues to give back to the community and takes time to guide aspiring dentists as well. Recognizing the importance of education, Dr. Lewis is an adjunct professor of dentistry at Baylor College.

The legend that is Dr. Lewis is known far and wide. His extensive knowledge of cosmetic dentistry and his incredible work ethic quickly gained him respect from his colleagues in the dental profession. Over his career, Dr. Lewis was routinely recognized for his expertise and contributions to the dental community.

His list of credentials could fill a sports arena, literally. He is the dentist of Olympic gold medal athletes, the Houston Astros, the Houston Rockets and many more.

He was named a "Top Doc" for 7 consecutive years by H Texas Magazine and was listed as a "Super Dentist" by Texas Monthly Magazine for multiple years. In addition, Dr. Lewis was elected by a group of his peers to be in the book Best Dentists in America.

In addition to his notable recognition for his work within the dental community, Dr. Lewis

has continued to serve on advisory boards of many non-profit organizations and on the boards of several schools. I served alongside him on the Abilene Christian University Board.

Our community has benefited greatly from the decades of service that Dr. Lewis has devoted. Dr. Lewis and his staff continue to be involved with Cypress-Woodlands Junior Forum, Be an Angel Fund, and Give Back a Smile.

The list of this model citizen's accomplishments is impressive and well-deserved, and it's no surprise that he's a Texan.

Dr. Lewis's service to his city, state and nation as well as his faith will have an enduring positive impact.

A dedicated family man, Dr. Lewis has been married to his wife, Holly for 33 years. Together, they are the proud parents of five children. Firm believers in Christian education, Dr. Lewis sent his children to Northland Christian School, the same school that my children attended, and where we both served on the Board of Trustees.

His success can be attributed to his faith, happy attitude about life and his career, and his genuine compassion and care for his patients. Dr. Lewis, thank you for your 30 years of service to our community and the State of Texas.

Another great, Texas legend we are proud to have among our neighbors. To 30 more years of making people smile, thank you Dr. Guy "Mojo" Lewis.

And that's just the way it is.

CELEBRATING THE SAN FRANCISCO GIANTS' WORLD SERIES WIN

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 3, 2014

Ms. PELOSI. Mr. Speaker, as a longtime season ticket holder and proud fan, I rise today to pay tribute to the 2014 World Series Champions, the San Francisco Giants.

On October 29, 2014, our beloved Giants won San Francisco's third championship in five years, defeating the Kansas City Royals in the seventh game of a down-to-the-wire World Series.

The Giants' post-season performance was masterful, a shared victory built on the shoulders of our entire team. The people of San Francisco salute our champions—players, coaches and staff who carried forward the banner of our city to seize the pennant and final victory. With timely hitting and phenomenal pitching, the Giants rose from the Wild Card to reclaim their position as baseball's champions.

In their hard-fought victory, the Giants have once again made us the proudest city in baseball, and given fresh energy to the talk of a rising dynasty on the Bay. Congratulations to all our 'Stronger Together' players, especially the members of the World Series roster: Tim Hudson, Jake Peavy, Ryan Vogelsong, Jeremy Affeldt, Santiago Casilla, Tim Lincecum, Javier López, Yusmeiro Petit, Sergio Romo, Hunter Strickland, Buster Posey, Jean Machi, Andrew Susac, Joaquín Arias, Brandon Belt, Brandon Crawford, Matt Duffy, Joe Panik, Pablo Sandoval, Gregor Blanco, Travis
